FOR USE IN: | CRIMINAL FUGITIVE APPREHENSION | MISSING PERSONS
| TARGET DEVELOPMENT | COLD CASES

HOSTED BY:

CHESTERFIELD, VA POLICE DEPARTMENT

AUGUST 23-25, 2027
CLICK HERE TO REGISTER

This three-day course introduces attendees to fundamental investigative techniques using historical and prospective cellular and social media records. Participants will gain a detailed understanding of the types of records available from major cellular providers and social media platforms, and how to effectively apply them in a variety of investigations.

The course also covers essential topics including basic cellular theory and function; the proper and legal processes for obtaining cellular and social media records; analysis and exploitation of call detail records; cellular mapping techniques; pen registers and trap-and-trace methods; global positioning data; call record research and target development; and the use of electronic surveillance.

**ATTENDEES SHOULD BRING A LAPTOP WITH INTERNET ACCESS,
WITH MICROSOFT EXCEL AND GOOGLE EARTH PRO INSTALLED.**
