This course enhances the capabilities of law enforcement officers tasked with apprehending violent offenders, regardless of their current assignment. The curriculum delivers the tactical and investigative edge needed to bring high-risk suspects into custody safely, emphasizing compliance-driven arrest philosophies designed to maximize safety and repeatability.

- **Tactical Execution:** Understand deliberate small-team CQB tactics and vehicle-based apprehensions.
- **Intelligence & Strategy:** Utilize advanced target research, arrest warrant case law, and proven fugitive tracking technology and methodologies.
- **Principle-Based Methods:** Implement simple, repeatable techniques used to search structures and locate active fugitives.

Through a dynamic blend of classroom discussions, expert demonstrations, and hands-on practical exercises, students will be exposed to the criminal apprehension process in-depth, learning the skills required to streamline small-team operations and minimize the inherent risks of the arrest warrant service.
